

Effective Implementation: What does it take?

Introduction to Implementation Science

FRANK PORTER GRAHAM CHILD DEVELOPMENT INSTITUTE

NATIONAL IMPLEMENTATION RESEARCH NETWORK

University of North Carolina at Chapel Hill

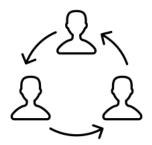

Frank Porter Graham Child Development Center

SISEP State Implementation and Scaling-up of Evidence-based Practices

Goals for Today

Share high leverage talking points about implementation science

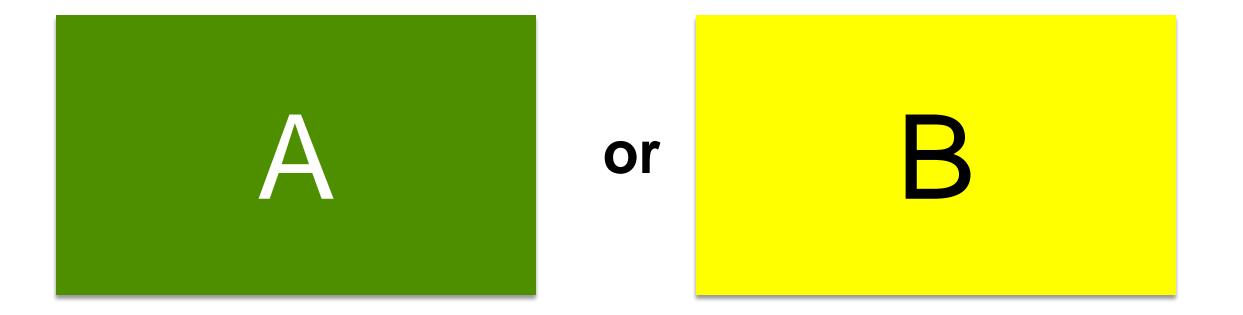

Promote **thinking** about the **relationship** between implementation science and your work

Provide information about **next steps** for additional resources for **deeper learning**

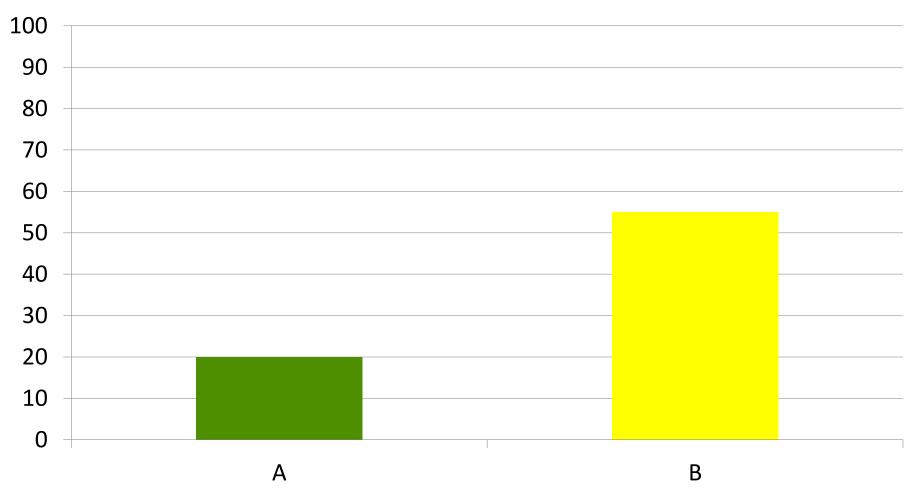

Which program would YOU want?

School Behavioral Health

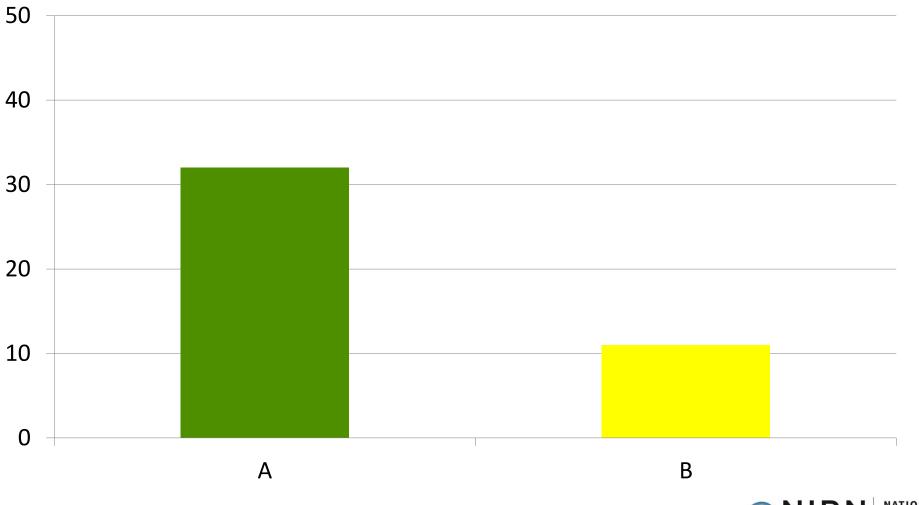

% Reduction in Aggression

Delinquency Treatment: Residential

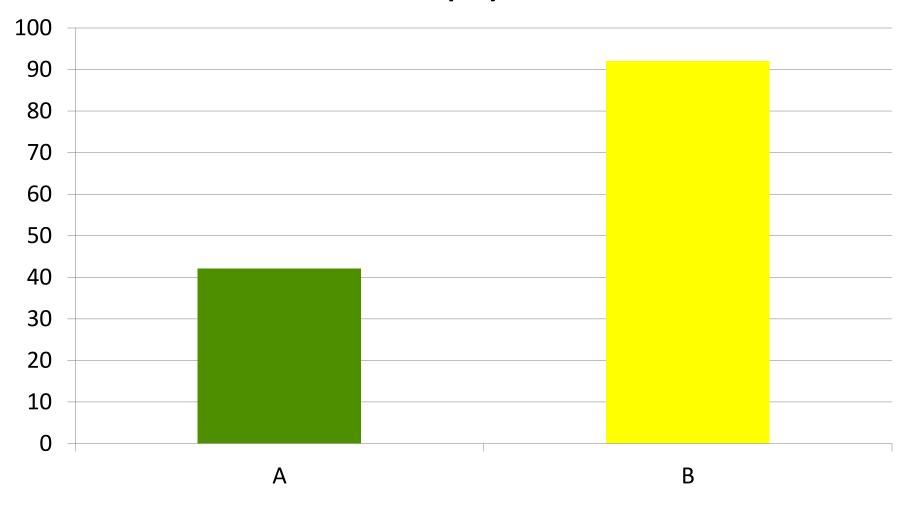

% Recidivism

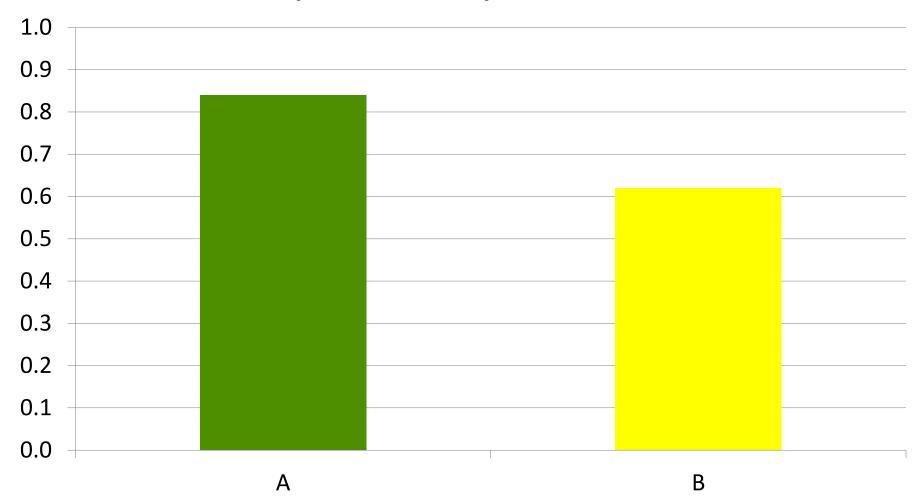

Adult MH Employment Program

% Employed

Behavior-Bullying School Program

Discipline Referrals per 100 Students

Choose a Program

Fidelity **FIRST**

In each chart A and B were the SAME PROGRAM! (EBPs = PATHS, TFM, SE, PBIS, DBT)

A = Low Fidelity use of EBP in practice B = High Fidelity use of EBP in practice

First do it as intended (if you can) then change it.

Achieve intended outcomes

Improve with **use** of data

Fidelity: Definition & Purpose

"the degree to which teachers and other program providers implement programs as intended by the program developer (emphasis in original)"

(Dusenbury, Brannigan, Falco & Hansen, 2003, p. 240)

Fidelity Data Help Us Understand Our Outcomes

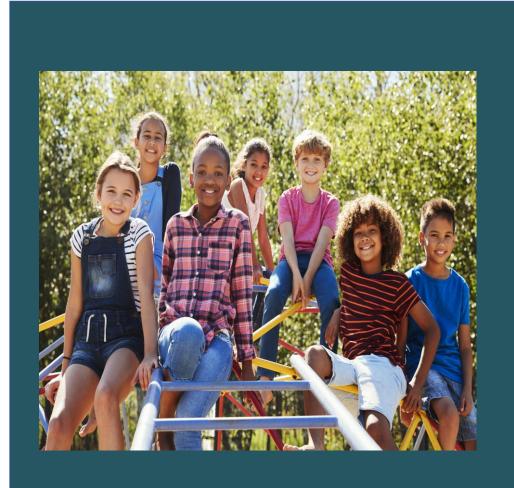

Fidelity Data Help Us Improve and Sustain Outcomes

Improve Individual Performance Improve Organizational Supports

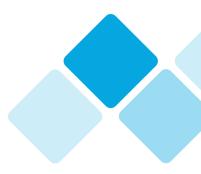

Activity: Reflect on Current Work..

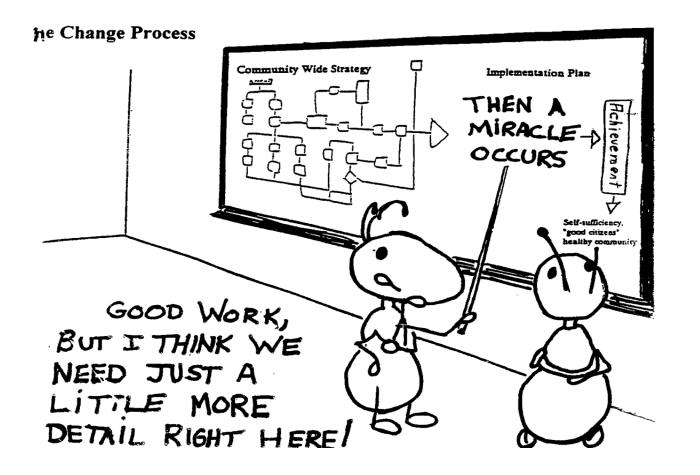

Think-Pair-Share

With a partner, answer the following question:

- 1. What do you think it takes to achieve use of a practice/program as intended? (3 min)
- 2. Discuss as a whole group. (2 min)

Implementation Science...

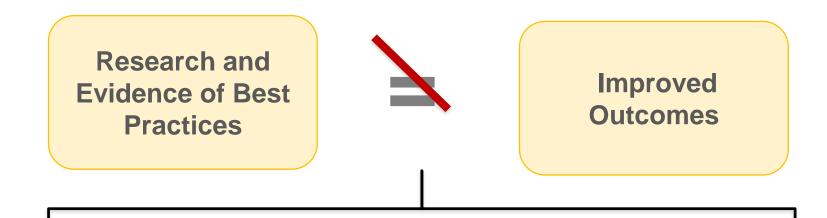

Implementation science refers to the "methods or techniques used to enhance the adoption, implementation, and sustainability" of an intervention (Powell et al., 2015)

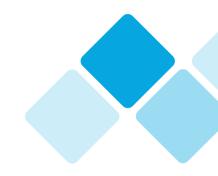

Implement = Use

Science to Service Gap: Implementation

- 1. What is adopted is not used with fidelity
- 2. What is used with fidelity is not sustained
- 3. What is used with fidelity is not used to scale

When used alone..

- Diffusion/ Dissemination of information
- Training
- Passing laws/ mandates/ regulations
- Providing funding/ incentives
- Organization change/ reorganization

Active Implementation

Effective Implementation

Enabling Contexts

FRANK PORTER GRAHAM CHILD DEVELOPMENT INSTITUTE

NATIONAL IMPLEMENTATION RESEARCH NETWORK

- What works, for whom, why, and in what circumstances?
- Who are we supporting to use the practice?

Contextual fit is the match between the strategies, procedures, or elements of a practice/program and the values, needs, skills and resources of those who implement and experience the practice/program.

(Horner, Blitz & Ross, 2014)

Active Implementation

Effective Implementation

Enabling Contexts

FRANK PORTER GRAHAM CHILD DEVELOPMENT INSTITUTE

NATIONAL IMPLEMENTATION RESEARCH NETWORK

Effective Implementation

- What are the visible supports needed?
- How we do transition those supports?

Supports throughout the system and for multiple programs

- Competency
- Organizational
- Leadership

Effective Implementation

- What are the visible supports needed?
- How we do transition those supports?

Common Implementation Dilemmas

- Program developer supports diminish (e.g., Coaching, fidelity assessments transition to local agency)
- Federal/State or Research/Evaluation Funding ends or is insufficient (e.g., Decision-support data systems are no longer funded)
- "Special" accommodations end (e.g., Planning periods end; integration of new services into overall service system takes place)

Active Implementation

Effective Implementation

Enabling Contexts

FRANK PORTER GRAHAM CHILD DEVELOPMENT INSTITUTE

NATIONAL IMPLEMENTATION RESEARCH NETWORK

Enabling Context

VALUE: Implementation is a *collaborative* act

Collaboration leads to:

- Knowledge and evidence that is more implementable
- Infrastructure that brings research evidence and implementation closer together
- Attention to local needs and increased relevance and impact of implementation activity
- Enhanced capacity and capability of implementation

Active Implementation

Effective Implementation

Enabling Contexts

...you go first!

Change is great...

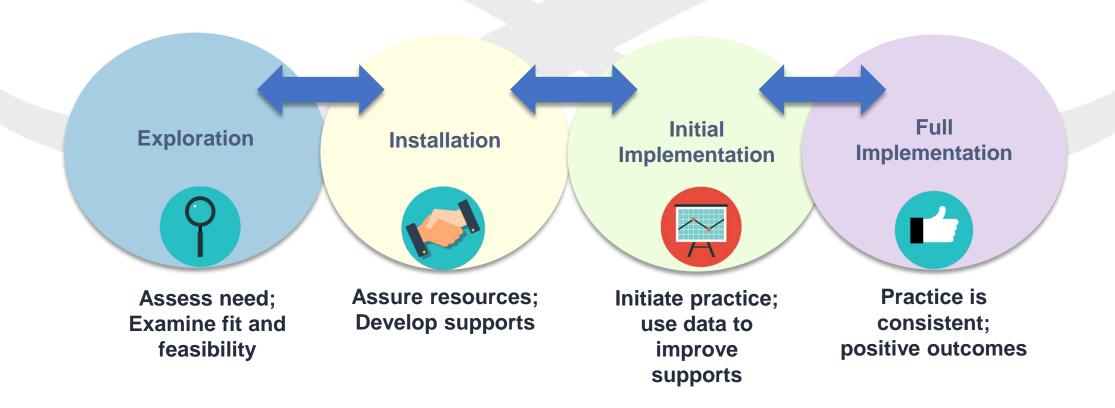

Active Implementation Frameworks

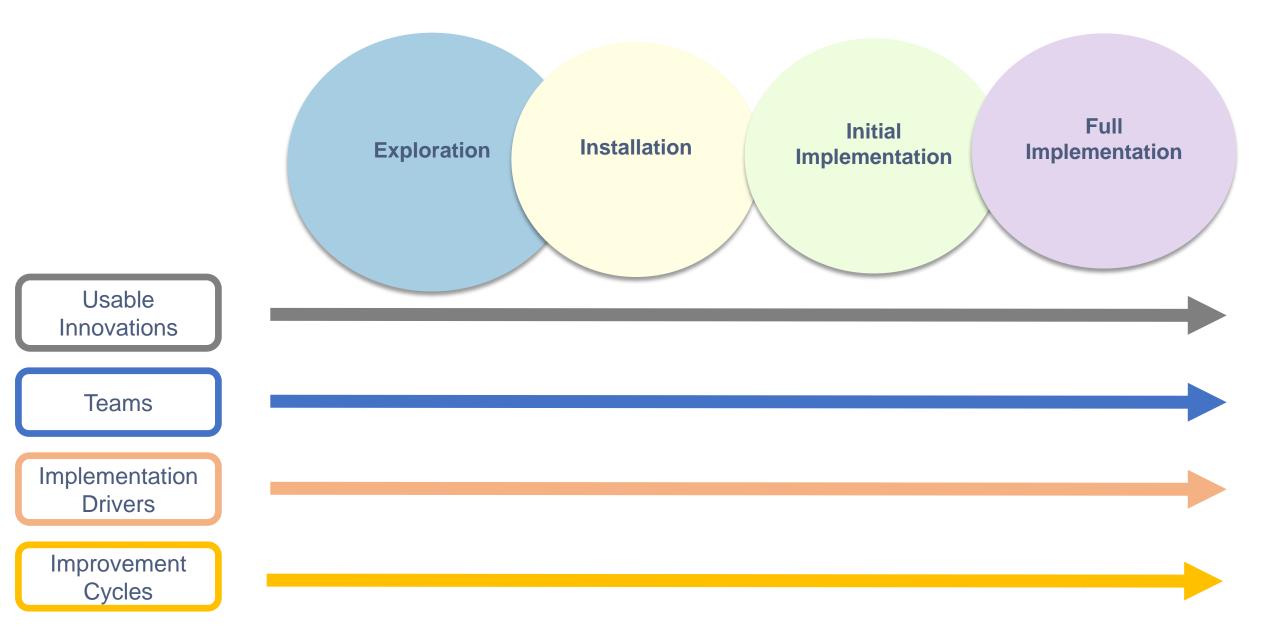

Our Current Context

Implementation Stages

In each stage....

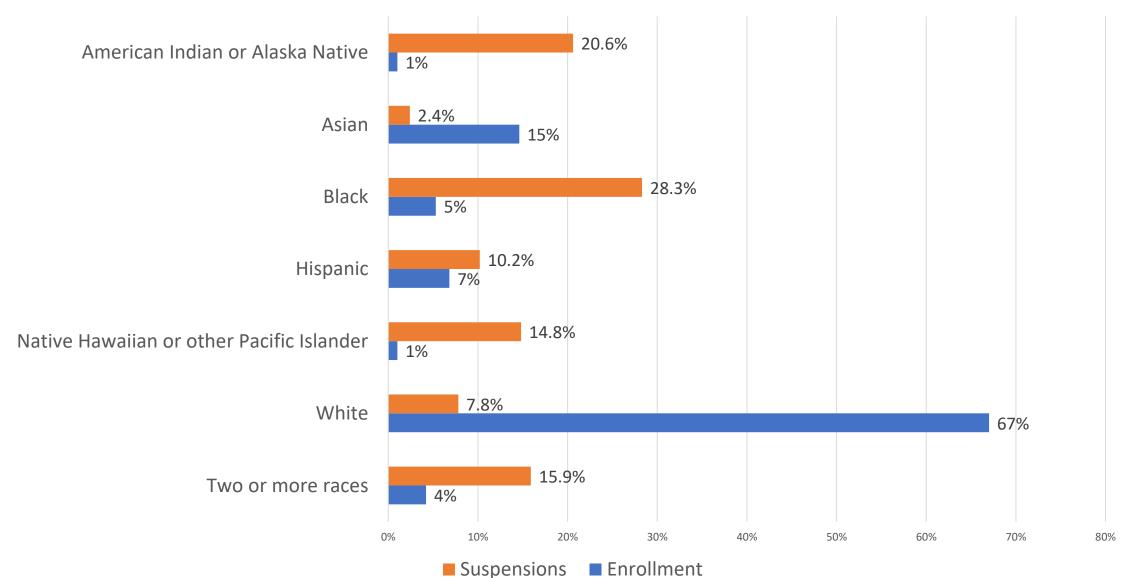

Case Example

Ward District

Out-of-School Suspensions by race/ethnicity

Exploration Stage

Assess need; Examine fit and feasibility

- Formed Representative District Implementation Team
- Determined Need and Identified Options including scan of current practices
- Assess Evidence, Fit, Feasibility of Identified Options
- Identify the infrastructure changes needed
- Create Readiness with stakeholders
- Create Communication Plan

PROGRAM INDICATORS

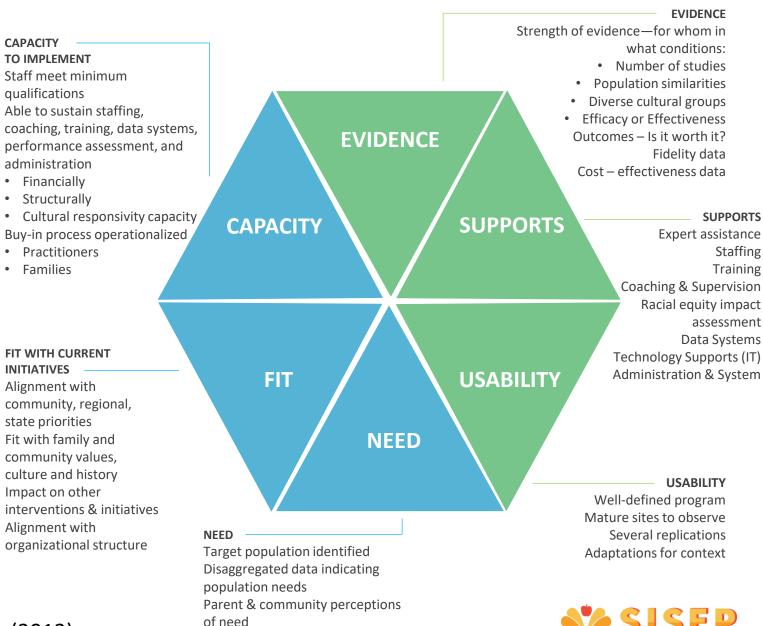

State Implementation and Scaling-up of Evidence-based Practices

Practice Selection: Hexagon Tool

Developed for use in implementation informed assessments

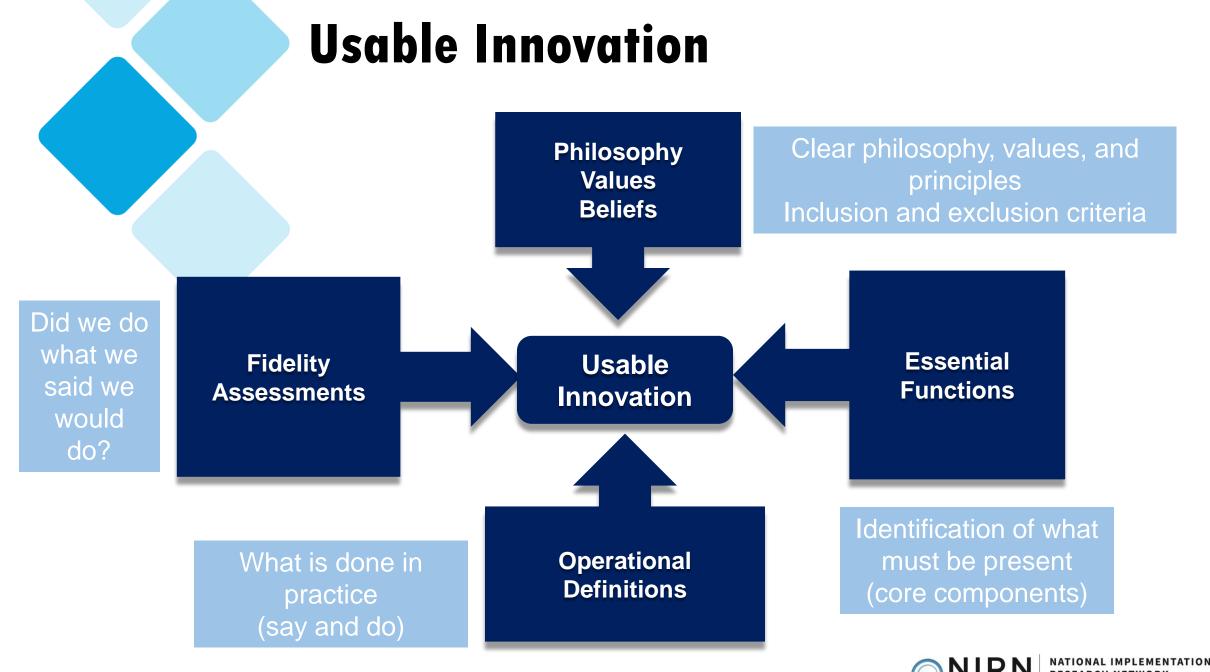

Reviewed and edited by the Racial and Ethnic Equity and Inclusion Team (REEI)

For use by organizations and communities

Addresses service or system gaps

Adapted from Blase, K., Kiser, L. and Van Dyke, M. (2013).

AT THE UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

Activity: Reflect on Policy Implications

Think-Pair-Share

With a partner, answer the following question:

- What are key takeaways from exploration and selection of practices to think about in terms of legislation or policy? (1 min)
- Discuss as a whole group. (2 min)

Exploration: Implications

- Time for exploration
 - Cost Benefit
- Identification of essential functions
- Selection based on analysis of evidence, usability, supports, needs, fit, and capacity
 - De-selection, de-implementation
- Engagement of stakeholders in exploration process
- Use of team for accountability purposes

Exploration

Assess need; Examine fit and feasibility

New Approaches to Policy Implementation (Ejler, Ostersen, Graff, Dyrby, 2016)

"

The Ministry of Social Affairs has gone from only thinking implementation when a law has been passed in Parliament. We have to think implementation before laws are adopted to have a better understanding of what works, what is possible, who are those implementing, what is their reality, what do they demand. Doing this, we make it much easier for ourselves and for those afterwards when we start to implement." Nina Eg Hansen, former Deputy Permanent Secretary and Director at Danish Ministry of Social Affairs, now Director of Department of Children and Youth, City of Copenhagen

What supports does Asha need to be successful in her role as a provider?

Implementation Drivers

Fixsen et al., 2005

Installation Stage

Installation

Assure resources; Develop supports

- Developing/refining the infrastructure or implementation supports
- Developing selection protocols (who?)
- Selecting first practitioners (users)
- Initiating training
- Developing coaching plans
- Evaluating and developing data systems
- Creating Readiness /Communicating

Activity: Reflect on Policy Implications

Think-Pair-Share

With a partner, answer the following question:

- What are key takeaways from the needed infrastructure to think about in terms of legislation or policy? (1 min)
- Discuss as a whole group. (2 min)

Installation: Implications

• Funding of implementation

Installation

Assure resources; Develop supports

- Support organizational capacity development
- Support use of different types of data within a system
 - Implementation Data
 - Outcome Data
- Support for follow-up and coaching necessary for changing practice (knowledge & practice change)
- Engagement of stakeholders

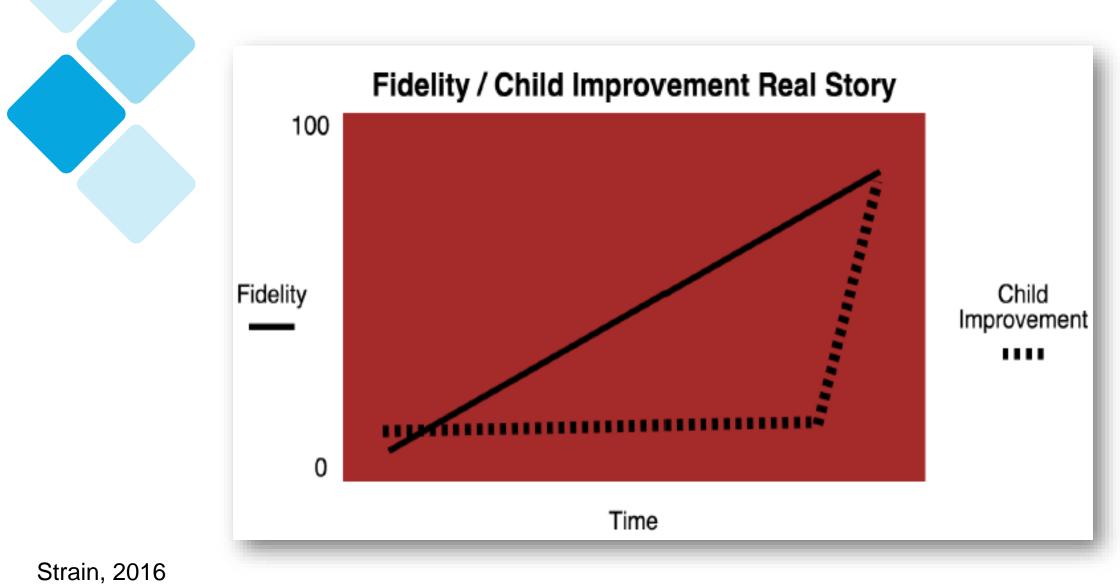

Initial Implementation Stage

Initial Implementation

Initiate practice; use data to improve supports

- Conducting assessment of initial selection, training, and coaching processes
- Ensuring training and coaching is provided with fidelity
- Using data within a plan do study act process to identify improvements and address barriers
- Communicating/Creating Readiness

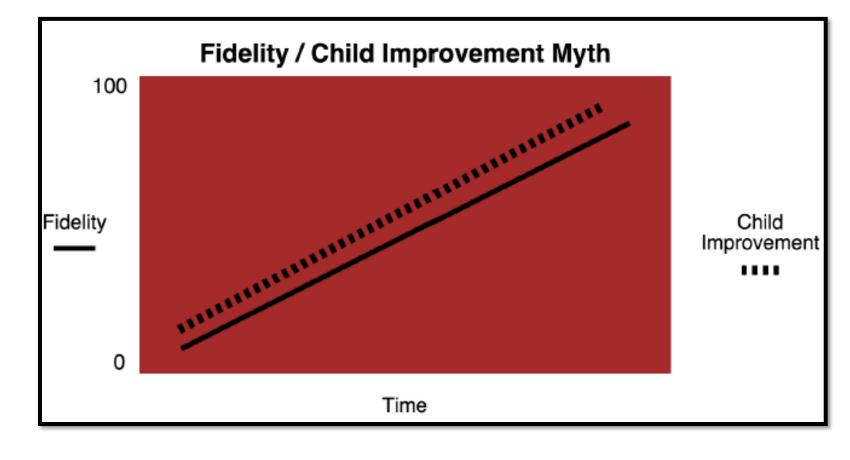

FRANK PORTER GRAHAM **CHILD DEVELOPMENT INSTITUTE**

NATIONAL IMPLEMENTATION RESEARCH NETWORK

Adults Supported By Coaching To Fidelity

Strain, 2016

Ward District

Out-of School Suspensions by Race/Ethinicity Over Time

80%

Activity: Reflect on Policy Implications

Think-Pair-Share

With a partner, answer the following question:

- What are key takeaways from initial implementation processes to think about in terms of legislation or policy? (1 min)
- Discuss as a whole group. (2 min)

Initial Implementation Implications

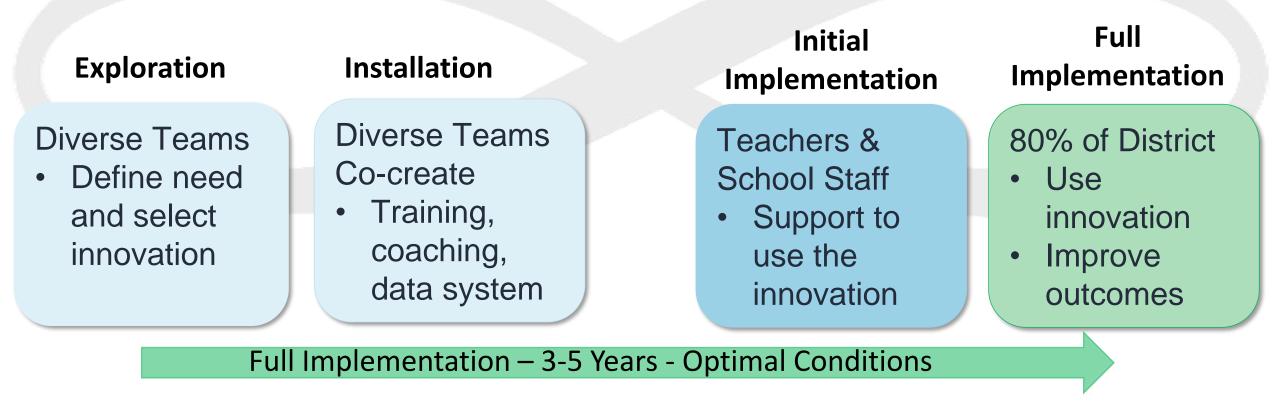

- Create value for implementation data (Fidelity) on way to improving outcomes
- Support an organization culture of learning start small, get better
- Time to demonstrate effective implementation and impact
- Feedback loop is critical to ensuring feedback from educators (implementers) is informing decisions regarding innovation, implementation supports, and policy
 - Practice Inform Policy --- Policy Enable Practice

Initial Implementation

Initiate practice; use data to improve supports

A Stage Based Approach...

Lessons Learned...

Have a plan based on best practices and scienceIdentify critical componentsExpect more to get more

Measure what is important

 Use frequent, relevant, & actionable data for planning

Make purposeful use of usability testing
Use PDSA to guide work with all
Improve methods and measures

Engage existing staff in developing capacity

- Be a systems change agent impacting knowledge, skills, and abilities
- Change hearts, minds, and behavior

Believe in Possibilities....
